• t.elbouzidi@ui.ma •

I am Taha El bouzidi. We are five members in my family. I am native to Meknes, and open to move to Marrakech. Currently, I am pursuing Bachelor of Science in Big Data Analytics (BSBDA) at Al Akhawayn University, and I am entering my first year of my graduation studies. Ever since, I was little. I realized; I enjoy computer programming. Since my childhood days, I have seen games made by gaming corporations, and I always wonder how they made them. this somehow further boosted my interest towards Big Data Analytics.

What I find attractive about being a scientist is that the profession is so demanding, everything changes, and every day is a new sunrise. Such a dynamic environment is very exciting, but a little bit stressful too.

In the future, I want to secure a job in a big programming company.

My long-term goal is gaining work experience of 5 years in the field of Big Data engineering. I wish to work on international level, contributing to the achievement of my success.

I am a self-motivated, and a disciplined soul. I always keep learning new things whenever I get a chance.

I am a certified resource on WORLD POLITICS AD INTERNATIONAL RELATIONS in June 2020.

Apart from studies, I enjoy participating in bodybuilding. I am a computer gaming player too.

My strengths are my analytical approach, my appreciable communication, and presentation skills.

SKILLS

- Event Planning
- Critical Thinking
- Language Teaching
- Community Development
- Communication
- Creativity

LONG-TERM GOALS:

My long-term objective is to take on larger, more difficult tasks in order to assess my ability. I intend to shape myself throughout this early period so that I am ready to deliver on larger ambitions later. Because I haven't yet been in the work sector, I haven't been able to put my talents to use.
